Langr Software Solutions Course Feedback

Customer: DTE

Course: Test-Driven Development and Refactoring in Java

Dates: 10/13/2008—10/15/2008

Instructor: James Grenning

Comments on the course content:

very interesting and useful

Comments on the instructor:

precise and thorough and helpful

Comments on the materials used in the course:

compact but "just enough"

What is the most useful thing you learned in this course?

apply the mock object

How might the course be improved?

more code demo for each mentioned technique.

General comments about the course:

excellent

Overall course rating:

1 2 3 4 5
poor fair good very good excellent

Would you recommend this course to others? Yes X No _____

May we quote you in promotional material? Yes X No _____

Course: Test-Driven Development and Refactoring in Java

Dates: 10/13/2008—10/15/2008

Instructor: James Grenning

Comments on the course content:

Just right for my experience.

Comments on the instructor:

well informed.

Comments on the materials used in the course:

Detail enough— Could have had some more hands on
Exercises.

What is the most useful thing you learned in this course?

To refactor ~~where~~ where needed, test every new functionality

How might the course be improved?

more hands on

General comments about the course:

Overall course rating:

1 2 3 4 5
poor fair good very good excellent

Would you recommend this course to others?

Yes No

May we quote you in promotional material?

Yes No

Course: Test-Driven Development and Refactoring in Java

Dates: 10/13/2008—10/15/2008

Instructor: James Grenning

Comments on the course content:

EXCELLENT

Comments on the instructor:

VERY KNOWLEDGABLE

Comments on the materials used in the course:

NOT EXHAUSTIVE.

What is the most useful thing you learned in this course?

Refactoring, Testing IS A
Discipline

How might the course be improved?

Exercise on some live projects

General comments about the course:

It is good to have our
knowledge refreshed as like this TDD.

Overall course rating:

1 2 3 4 5
poor fair good very good excellent

Would you recommend this course to others?

Course: Test-Driven Development and Refactoring in Java

Dates: 10/13/2008—10/15/2008

Instructor: James Grenning

Comments on the course content:

very good, interesting content

Comments on the instructor:

well organized, concise

Comments on the materials used in the course:

Very good. Enjoyed the refactoring part.

What is the most useful thing you learned in this course?

Refactoring patterns. Testing with legacy code

How might the course be improved?

—

General comments about the course:

- Thought it was very good.
- Enjoyed it

Overall course rating:

1
poor

2
fair

3
good

4
very good

5
excellent

Would you recommend this course to others?

Yes

No

Course: Test-Driven Development and Refactoring in Java

Dates: 10/13/2008—10/15/2008

Instructor: James Grenning

Comments on the course content:

It was just enough!

Comments on the instructor:

Jeff did a wonderful job of engaging participants and moving at a comfortable, productive pace.

Comments on the materials used in the course:

The materials were thorough both in depth and breadth. The examples were easy to follow.

What is the most useful thing you learned in this course?

How to become better @ re-factoring through use of TDD, thereby creating better quality code.

How might the course be improved?

Invite actual code to be re-factored that the participants wrote on a project at work.

General comments about the course:

Overall course rating:

1 2 3 4 5
poor fair good very good excellent

Would you recommend this course to others? Yes No
